The goal of the Case Studies is to learn about good residential design by analyzing an architecturally designed house. Print out this floor plan and click on the Project Link under the player to review the project images, a description of the project, and a profile of the architect. Determine what you think the architect was trying to achieve with the design and then click on the video to watch John Brown complete his analysis of the project. To discuss the case study further with John, and other participants, add your comments to the blog.
