

Watch the Mar 8 Slow Home Report for a discussion of this plan

This is the Project Documentation Package for Day Two of this week's *Design Project*. The goal of the *Design Project* exercises is to learn about the design process for making an existing home more Simple, Light, and Open. Starting with the recommendations from yesterday's session, use this demolition plan to develop a concept design for the alterations to this home. Use the scaled templates on the attached sheet as an underlay guide for the various elements you might need.

When you are ready, watch John Brown complete the second part of the *Design Project* and compare your results. To discuss the exercise further with John, and other participants, add your comments to the blog.
