

DESIGN BRIEF

The Ratliff's are a couple in their mid 50's. They have lived in a series of large houses in suburban Pittsburg as they raised their three children. As they contemplate retirement in the next five years, and with the children out of the house, they have moved into an established, walkable neighborhood closer to downtown. They purchased a 1550 square foot two storey narrow lot home that had been a rental property for most of its life and is now in pretty rough condition. Steve and Gabriella want to transform this house into a great place to live. In this week's design we are going to concentrate on the main floor.

The Ratliffs don't like the front nor the back entry, the enclosed kitchen, or the fact that there is no guest bathroom on the main floor. The front of the house faces southwest and out to a pleasant tree-lined neighborhood street. They want to capitalize on the view and light by having their main outside living space at the front. The rear yard, however, is also quite nice, and they would like to develop it as a secondary outdoor living space.

Dennis is moving up from a condominium that he has lived in for the past five years. He has enough equity after selling to do a fairly major upgrade to this unit.

This is the Project Documentation Package for Part One of this week's *Design Project*. The goal of the *Design Project* exercises is to learn about the design process for making an existing home more Simple, Light, and Open. Review the Design Brief in this documentation package to understand what the client needs and wants for their home. Use the existing floor plan to analyze how Simple, Light and Open the home is in terms of these needs. For background information on what to look for, review the Simple Light Open description on the website.

Draw overtop of the plan as you analyze the house and then write down your observations about the design and your recommendations for change. When you are ready, watch John Brown complete the first part of the Design Project and compare your results. To discuss the exercise further with John, and other participants, add your comments to the blog. In the next segment we will be applying these recommendations to create a concept design.
