

DESIGN BRIEF

The clients are the Taylor's, a soon to be retired couple who downsized from their large family home into this 1500 square foot condominium. The unit was constructed in the 1960's and was in original condition when the Taylor's recently purchased it. The design of the main floor changes were completed in previous Design Project Segments – 02.24, 02.25, 02.26.

The Taylor's would now like to complete the project with an upgrade to the second floor. As they are alone, the second bedroom and bathroom are a lower priority because they will only be used occasionally by guests. However, they do want them brought up to the standard of the rest of the house. The master ensuite, however, is more of a concern. They do not like the fact that it is open to the bed and they would also prefer a large shower to a bathtub. If possible they would prefer to have more closet space in the master suite.

To learn more about the client, review her Residential Profile and Slow Home Test Results.

This is the Project Documentation Package for Part One of this week's *Design Project*. The goal of the *Design Project* exercises is to learn about the design process for making an existing home more Simple, Light, and Open. Review the Design Brief in this documentation package to understand what the client needs and wants for their home. Use the existing floor plan to analyze how Simple, Light and Open the home is in terms of these needs. For background information on what to look for, review the Simple Light Open description on the website.

Draw overtop of the plan as you analyze the house and then write down your observations about the design and your recommendations for change. When you are ready, watch John Brown complete the first part of the Design Project and compare your results. To discuss the exercise further with John, and other participants, add your comments to the blog. In the next segment we will be applying these recommendations to create a concept design.

RESIDENTIAL PROFILE - TAYLOR RESIDENCE

1. Describe your goals for your house
