

## DESIGN BRIEF

The client for this project is Rona Gonzales is the client for this project. She is a lawyer in her late 40's and has shared custody of her teenage son. She purchased this 1980's condominium unit in downtown Philadelphia after living in a rented suburban home for several years that was close to her son's school. His graduation to high school allowed her to move into a more urban situation that better suits the way she wants to live. This two bedroom unit was originally in the rental pool for the building and is in poor repair.

Rona loves to cook and regularly entertains her close circle of friends over dinner. She values her privacy and would like to have a very nice master bedroom suite with lots of closet space. Her son, who lives with her 3 days a week, is not as particular about his bedroom although he would like a big screen television somewhere in the home. The building has a large laundry facility on each floor as well as a good size storage locker for each unit in the underground parking structure. Rona is prepared to spend a moderate amount of money upgrading her new home and plans to live there for at least the next ten years.

This is the Project Documentation Package for Part One of this week's *Design Project*. The goal of the *Design Project* exercises is to learn about the design process for making an existing home more Simple, Light, and Open. Review the Design Brief in this documentation package to understand what the client needs and wants for their home. Use the existing floor plan to analyze how Simple, Light and Open the home is in terms of these needs. For background information on what to look for, review the Simple Light Open description on the website.

Draw overtop of the plan as you analyze the house and then write down your observations about the design and your recommendations for change. When you are ready, watch John Brown complete the first part of the Design Project and compare your results. To discuss the exercise further with John, and other participants, add your comments to the blog. In the next segment we will be applying these recommendations to create a concept design.
