

The goal of the What's Wrong With This House? exercises is to learn how to evaluate a cookie cutter house plan. Print out this sheet and think about how Simple, Light and Open the design is. For background information on what to look for review the Simple Light Open page on the website.

Make notes and draw overtop of the plan as you analyze the house. Write down your observations about how Simple, Light and Open you think it is and then summarize your evaluation with an overall letter grade. When you are ready, watch John Brown complete the exercise and compare your results. To discuss the exercise further with John, and other participants, add your comments to the blog.
